

EFFECTIVE LAND USE TESTIMONY

X. REVISIONS/UPDATES

The first formal Effective Land Use Testimony training workshop by the three sponsors occurred in 2013. It was identified as “Rough Notes” dated June 19, 2013. It was revised during the spring/summer of 2014 by the sponsors.

The goal as noted in Chapter IX, Training Evaluation, is that eventually the revisions and updates will be a collaborative process between the training participants and the training sponsors. This is crucial for improving the training.

Regardless of its evolving draft nature, the Effective Land Use Training workshops will be shared publically through web publication as it is believed improvements are more probable once the ELUT has developed into a written training program.

Construction underway.

Revised May 21, 2014.
